

### *Materials*

A BEOC (Basic Electrical Output Socket), like a small lamp-type connection, where you just have a simple plug and wire that would plug into a light bulb. One of cords mentioned above, if you can't find one then construct your own... Same voltage connection, but the restrainer must be built in (I.E. The central box) Two phone jacks (one for the modem, one for if you are being traced to plug the aqua box into) Some creativity and easy work.

Notice: No phones have to be destroyed/modified to make this box, so don't go out and buy a new phone for it!

### *Procedure*

All right, this is a very simple procedure. If you have the BEOC, it could drain into anything: a radio, or whatever. The purpose of having that is you are going to suck the voltage out from the phone line into the electrical appliance so there would be no voltage left to lock you in with.

- 1.Take the connection cord. Examine the plug at the end. It should have only two prongs. If it has three, still, do not fear. Make sure the electrical appliance is turned off unless you want to become a crispy critter while making this thing. Most plugs will have a hard plastic design on the top of them to prevent you from getting in at the electrical wires inside. Well, remove it. If you want to keep the plug (I don't see why...) then just cut the top off. When you look inside, Low and Behold, you will see that at the base of the prongs there are a few wires connecting in. Those wires conduct the power into the appliance. So, you carefully unwrap those from the sides and pull them out until they are about an inch ahead of the prongs. If you don't want to keep the jack, then just rip the prongs out. If you are, cover the prongs with insulation tape so they will not connect with the wires when the power is being drained from the line.
- 2.Do the same thing with the prongs on the other plug, so you have the wires evenly connected. Now, wrap the end of the wires around each other. If you happen to have the other end of the voltage cord hooked into the phone, stop reading now, you're too fucking stupid to continue. After you've wrapped the wires around each other, then cover the whole thing with the plugs with insulating tape. Then, if you built your own control box or if you bought one, then cram all the wires into it and reclose it. That box is your ticket out of this.
- 3.Re-check everything to make sure it's all in place. This is a pretty flimsy connection, but on later models when you get more experienced at it then you can solder away at it and form the whole device into one big box, with some kind of cheap Mattel hand-held game inside to be the power connector. In order to use it, just keep this box handy. Plug it into the jack if you want, but it will slightly lower the voltage so it isn't connected. When you plug it in, if you see sparks, unplug it and restart the whole thing. But if it just seems fine then leave it.

### *Use*

----

Now, so you have the whole thing plugged in and all... Do not use this unless the situation is desperate! When the trace has gone on, don't panic, unplug your phone, and turn on the appliance that it was hooked to. It will need energy to turn itself on, and here's a great source... The voltage to keep a phone line open is pretty small and a simple light bulb should drain it all in and probably short the FBI computer at the same time.

## **39. Hindenberg Bomb by The Jolly Roger**

Needed:

- 1 Balloon
- 1 Bottle
- 1 Liquid Plumber
- 1 Piece Aluminum foil
- 1 Length Fuse

Fill the bottle 3/4 full with Liquid Plumber and add a little piece of aluminum foil to it. Put the balloon over the neck of the bottle until the balloon is full of the resulting gas. This is highly flammable hydrogen. Now tie the balloon. Now light the fuse, and let it rise. When the fuse contacts the balloon, watch out!!!

## **40. How to Kill Someone with your Bare Hands by The Jolly Roger**

This file will explain the basics of hand-to-hand combat, and will tell of the best places to strike and kill an enemy. When engaged in hand-to-hand combat, your life is always at stake. There is only one purpose in combat, and that is to kill your enemy. Never face an enemy with the idea of knocking him out. The chances are extremely good that he will kill YOU instead. When a weapon is not available, one must resort to the full use of his natural weapons. The natural weapons are:

- 1.The knife edge of your hands.
- 2.Fingers folded at the second joint or knuckle.
- 3.The protruding knuckle of your second finger.
- 4.The heel of your hand.
- 5.Your boot
